MEDICON 25 COURSES

Plastic / ENT SURGERY

1st Course of Primary & Secondary Rhinoplasty

October 4th - 5th,
2012

Marienhospital Stuttgart
Germany

Welcome

Dear colleagues,

Rhinoplasties are the most common surgical procedures in the face but this operation has also one of the highest failure rates. This has different reasons. Each rhinoplasty affects the shape as well as the function. Both aspects have to be considered in planning such a procedure. The reasons for the high failure rate are mainly insufficient analysis, imprecise or inadequate techniques, rough tissue handling and mainly limited experience.

Since 20 years we offer courses for functional and aesthetic rhinoplasties. We are convinced that the greatest benefit results from live surgery and intensive discussions with the surgeon. After developing and designing a rhinoplasty instrument set together with Medicon eG I was asked through them if I would offer such a two days workshop for interested colleagues. This is fine for us and I invite you to come to Stuttgart. It will be a pleasure for us to demonstrate to you the newest techniques and our concept in this challenging field of surgery.

With kind regards,
Prof. Dr. Wolfgang Gubisch
